

# BPCI-A Program Overview

## Quality Measures: Model Years (MY) 4-6

- CMS applies these quality adjustments on the full MY rather than individual Performance Periods
- Scores across all episodes attributed to an episode initiator will be weighted and summed into one Composite Quality Score (CQS).
- Both Tower Health participating hospitals have chosen to be accountable for Administrative Quality Measure sets as outlined below.

Measure	Source
<b>All Episodes</b>	
Pottstown Hospital: Sepsis, COPD, Simple Pneumonia, UTI, Cellulitis, Renal Failure Reading Hospital: Major Bowel Procedure & Bariatric Surgery
